Task: Estimate range 071-326-0512

Conditions: During daylight, given one target from 100 to 300 meters away, one target from 300 to 500 meters away, three targets at 500 to 1,500 meters away, and a pair of binoculars. Targets may be soldiers, vehicles, equipment, E-type silhouettes, water tanks, or buildings

Standards: Estimate the range of each of the five targets within 20 percent of the actual range.

Task: Evaluate a Casualty (Tactical Combat Casualty Care)
081-831-1001

Conditions: You have a casualty who has signs/symptoms of an injury. Your unit may be under fire.

Standards: Evaluate the casualty following the correct sequence. Identify all life-threatening conditions and other serious wounds.

Task: Perform First Aid to Restore Breathing and/or Pulse
081-831-1023

Conditions: You see an adult casualty who is unconscious and does not appear to be breathing. You are not in a combat situation or chemical environment. You will need a nasopharyngeal airway (NPA).

Standards: Take appropriate action, in the correct sequence, to restore breathing and, if necessary, restore the pulse. Continue until the casualty's breathing/pulse returns, a qualified person relieves you, a physician stops you, or you are too tired to continue.

Task: Perform First Aid for a Bleeding of an Extremity081-831-1032

Conditions: You have a casualty who has a bleeding wound of the arm or leg. The casualty is breathing. You will need the casualty's emergency bandage, chitosan dressing, or field dressing, materials to improvise a pressure dressing (wadding and cravat or strip of cloth), materials to elevate the extremity (blanket, shelter half, poncho, log, or any available material), and combat application tourniquet (C-A-T) or materials to improvise a tourniquet—rigid object (stick, tent peg, or similar object) and a strip of cloth.

Standards: Control bleeding from the wound following the correct sequence. Place a dressing over the wound with the sides of the dressing sealed so it does not slip. Ensure that the dressings do not have a tourniquet-like effect. Apply a tourniquet to stop profuse bleeding not stopped by the dressings, for severed arms and legs, or to control life-threatening bleeding when under fire.

Task: Navigate Using the Defense Advanced Global Positioning System (GPS) Receiver (DAGR) 113-610-2005

Conditions: Given a DAGR GPS in a hostile environment where the Soldier has to maintain constant awareness at all times. Soldiers will be aware of contemporary operational environment factors such as extreme temperature differences, unstable political state and hostile locals are of the essence to maintain vital communications.

Standards: Are met when the Soldier successfully navigates using the DAGR GPS in the hostile.

Task: Perform Voice Communications 113-571-1022

Conditions: Given: (1) One operational radio set for each net member, warmed up and set to the net frequency. (2) A call sign information card (5 x 8) consisting of net member duty position (S-1, S-2), net call sign (letter-number-letter), suffix list (Net Control Station [NCS] - 46, S-1 – 39, S-2 - 13), and a message to be transmitted. (3) Situation: The net is considered secure, and authentication is not required.

Note: This task may have as many net members as there is equipment available. Each net member must have a different suffix and message to transmit.

Standards: Enter a radio net, send a message, and leave a radio net using the proper call signs, call sign sequence, prowords, and phonetic alphabet and numerals with 100-percent accuracy.

Task: Request Medical Evacuation

Conditions: You have a casualty requiring medical evacuation 081-831-0101

(MEDEVAC) and you will need a patient pickup site. You will need operational communications equipment, MEDEVAC request format, and unit signal operations instructions (SOI).

Standards: Transmit a MEDEVAC request, providing all necessary information as fast as possible. Transmit, as a minimum, line numbers 1 through 5 during the initial contact with the evacuation unit. Transmit lines 6 through 9 while the aircraft or vehicle is en route, if not included during the initial contact. (See table 081-831-0101-1 and table 081-831-0101-2.)

Task: Navigate from One Point on the Ground to Another Point While Dismounted 071-329-1006

Condition: Given a 1:50,000-scale topographic map of the area, a coordinate scale, a protractor, a magnetic compass, a map marker and a record of data sheet, a designated point on the ground, and a requirement to conduct dismounted movement to the designated point.

Standard: Navigate to the designated point using terrain association, dead reckoning, or a combination of the two.
